Inspector Observations:

22. SEWAGE AND WASTEWATER PROPERLY DISPOSED

Violation Description: A facility must have an approved and properly functioning plumbing system at all times. All liquid waste must drain to an approved, fully functioning sewage disposal system. Fully functional restrooms must be provided for employee use during hours of operation. (114197, 114250)

Violation Comments: Water from plumbing in ceiling from upstairs suite leaking into facility and onto floor. Water is waste water from drain pipes from Nestle Toll House.

Overall Inspection Comments

An initial complaint investigation was conducted at this time by D. Spencer in response to CO0076429. A water leak was observed inside the facility by the front doors. Water was observed dripping from ceiling into several plastic containers on the floor. After speaking with operator in suite above this facility (Nestle), it was determined that water was wastewater from several of their floor drains serviced by three hand sinks, 3-compartment sink, dump sink, prep sink, drains from espresso machine and other small equipment. Ceiling tiles have been removed and plumbing in ceiling exposed. Water was observed on floor of facility with caution sign posted nearby. Facility voluntarily closed at the time due to uncontrollable wastewater leakage. Facility to remain closed until approved by this Department to reopen. Repairs are expected to take place overnight tonight. Properly clean and sanitize affected areas of facility. Contact this office at 951-461-0284 (D. Spencer) once repairs have been completed and facility has been cleaned in order to reopen. CLOSED sign posted on exterior of facility. Do not remove CLOSED sign by penalty of citation.
