PR0074544	12/31/2022	Follow-up inspection	4/27/2022	(951)203-5013	2620	0054	Maxine Martinez	**Points Deducted** 0

The conditions listed below correspond to violations of the California Health and Safety Code and/or Riverside County Ordinances and must be corrected as indicated by the enforcement officer. The Department of Environmental Health appreciates your cooperation.

Failure to correct listed violation(s) prior to the designated compliance date may necessitate an additional reinspection at a charge determined by Riverside County Ordinance 640.

Major / Minor Violations: Major Violations are those that pose an imminent risk to public health and warrant immediate closure of the food facility or immediate correction. Minor Violations are those violations that do not pose an imminent public health risk, but do warrant correction.
GRADE REPRESENTS THE FOLLOWING RANGES: A = 100-90 Passed inspection / meets minimum health standards. B = 89-80 Did not pass inspection / does not meet minimum health standards. C = 79-0 Failed inspection / conditions exist which may pose a potential or actual threat to public health and safety. The facility is required to display a grade card in a conspicuous place selected by the Enforcement Officer. The grade card shall not be concealed and can only be removed or relocated by the Enforcement Officer per County Ordinance 492 / County Code Section 8.40.020

Overall Inspection Comments

Joint re-inspection with Kristin.
Re-inpsection due to failed inspection and closure of facility due insufficient hot water on 4-19-22.
-Observed water temperature through out the facility provided at 123F. Facility was approved to re-open at time of inspection.
-Observed all violation noted on 4-19-22 corrected at time of inspection. "B" card removed and "A" card was posted at time of inspection.

*Note: A new tankless water heater was installed, Navien model number NPE-S2. After doing a water heater calculation based on the faucets you have you need a 7.5GPM tankless water heater, the new water heater that was installed is a 6.5GPM at a 60° rise. Upgrade to an adequate sized approved water heater or install an additional unit in parallel. Reinspection for adequate sized water heater or additional unit installed in parallel is set for 4/27/22.

*Monitor hot water supply and cease to operation if it falls below 100F.

*If you have any questions contact B. Lopez at 951-273-9149 or BonnesaLope@rivco.org

Did you know that effective January 1, 2018, the California Health and Safety Code was amended to make it easier for food facilities to donate food? Please consider donating your excess food product to a local food bank, pantry, or soup kitchen. As a good faith food donor, you are protected from civil and criminal liability if the food product later causes harm to its recipient, unless the injury is a direct result of gross negligence or intentional misconduct in the preparation or handling of the donated food. See Section 171425 of the Civil Code and Sections 114432 to 114434 inclusive of the Health and Safety Code. For more information visit our website at www.rivcoeh.org.

REASONS FOR IMMEDIATE CLOSURE OF A FOOD FACILITY

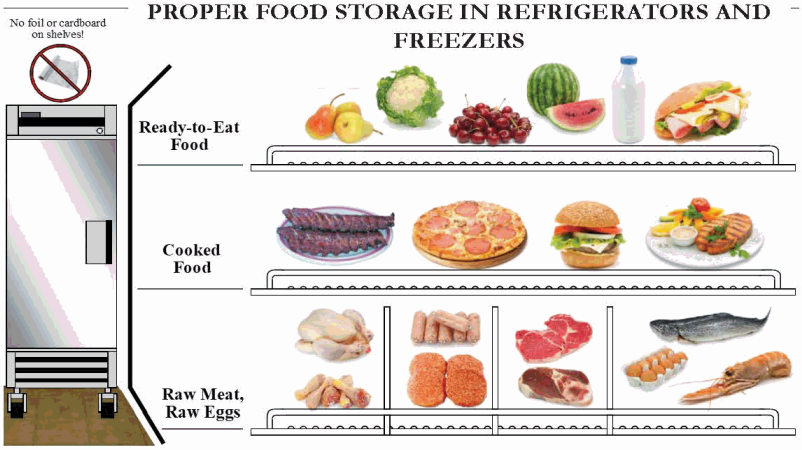
Per California Health and Safety Code Section 114409 (a):
"If any imminent health hazard is found, unless the hazard is immediately corrected, an enforcement officer may temporarily suspend the permit and order the food facility immediately closed."

A food facility may be closed for any of the following reasons:

- Overflowing sewage (inside or outside the facility)
- No potable water
- No hot water
- No electricity
- Rodent or insect infestation
- Any other conditions at the facility that may create an imminent public health risk

In addition to the reasons above, Per California Heath and Safety Code Section 114411:
"The enforcement agency may, after providing opportunity for a hearing, modify, suspend, or revoke a permit for serious or repeated violations of any requirement of this part or for interference in the performance of the duty of the enforcement officer."

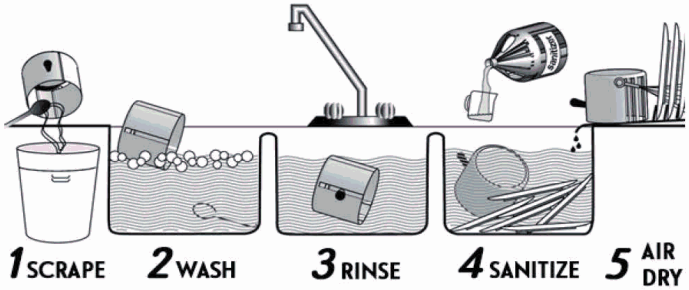
PROPER FOOD STORAGE IN REFRIGERATORS AND FREEZERS



Store cooked and ready-to-eat food above raw food to avoid cross-contamination.
Keep all food covered to prevent contamination

MANUAL SANITIZING OF EQUIPMENT AND UTENSILS USING A THREE COMPARTMENT SINK

1. **SCRAPE**, clean, or soak items as necessary before washing.
2. **WASH** items in detergent and hot water of at least 100°F in the first sink.
3. **RINSE** items in clear water in the second sink.
4. **SANITIZE** by submerging each item in a sanitizing solution in the third sink. Use one of the following sanitizing methods:
   - 100ppm of a chlorine based sanitizer for a minimum of 30 seconds in the solution
   - 200ppm of a quaternary ammonium based sanitizer for a minimum of 60 seconds in the solution
   - 25ppm of an iodine based sanitizer for a minimum of 60 seconds in the solution
   - Water at a temperature of 171°F for a minimum of 30 seconds in solution
5. **AIR DRY** all items on the drain board.



PROPER COOLING OF FOOD IN YOUR FACILITY

Potentially hazardous foods should always be rapodly cooled.

TIME IS THE KEY FACTOR IN PROPER COOLING

- **Foods must cool from 135°F to 70°F in 2 hours or less**
- **Foods must cool from 70°F to 41°F in 4 hours or less**

Use one of the following methods to cool food properly:

- Break large foods down into smaller portions and place in shallow pans no more than 4 inches deep. Metal pans cool better than glass or plastic pans.
- Add ice as an ingredient to replace water used in the recipe.
- Place foods within an ice bath and frequently stir the foods to speed the cooling process.
- Loosely cover foods so that heat and steam can escape during cooling.
- Arrange containers within a refrigeration unit so that air can flow properly around containers.
- Use special equipment like chill paddles or blast chillers to rapidly bring down food temperature.

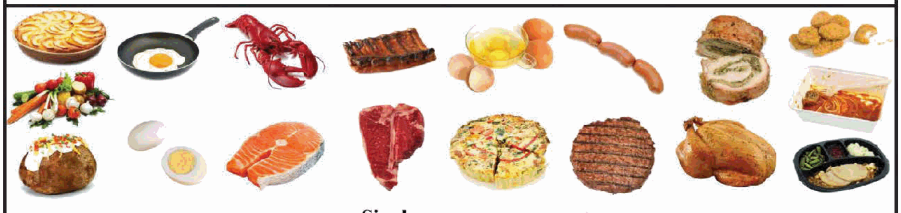
Use an accurate thermometer to verify the food is being cooled within proper timeframes.

PROPER FOOD THAWING METHODS

1. Under refrigeration
2. In a microwave oven on "defrost"
3. Submerged under cold running water in an approved preparation sink for no longer than 2 hours
4. As part of the cooking process

INTERNAL COOKING TEMPERATURES

Use a probe thermometer to take internal cooking temperatures



Fruit and Vegetables	Eggs Cooked to Order	Fish	Single Piece Meat (Beef, Veal, Lamb, Pork)	Pooled Eggs	Ground Meat and Sausage	Poultry and Stuffed Meat	Reheated Foods
135°F for 15 seconds	145°F for 15 seconds	145°F for 15 seconds	145°F for 15 seconds	155°F for 15 seconds	155°F for 15 seconds	165°F for 15 seconds	165°F for 15 seconds

Food temperature cannot be felt - use your probe thermometer!
