The conditions listed below correspond to violations of the California Health and Safety Code and/or Riverside County Ordinances and must be corrected as indicated by the enforcement officer. The Department of Environmental Health appreciates your cooperation.

Failure to correct listed violation(s) prior to the designated compliance date may necessitate an additional reinspection at a charge determined by Riverside County Ordinance 640.

Major / Minor Violations: Major Violations are those that pose an imminent risk to public health and warrant immediate closure of the food facility or immediate correction. Minor Violations are those violations that do not pose an imminent public health risk, but do warrant correction. GRADE REPRESENTS THE FOLLOWING RANGES: A = 100-90 Passed inspection / meets minimum health standards. B = 89-80 Did not pass inspection / does not meet minimum health standards. C = 79-0 Failed inspection / conditions exist which may pose a potential or actual threat to public health and safety. The facility is required to display a grade card in a conspicuous place selected by the Enforcement Officer. The grade card shall not be concealed and can only be removed or relocated by the Enforcement Officer per County Ordinance 492 / County Code Section 8.40.020

In = In compliance

COS = Corrected on-site

N/O = Not observed

N/A = Not applicable

OUT = Out of compliance

37. EQUIPMENT, UTENSILS, LINENS: STORAGE AND USE

POINTS

Inspector Comments: - Provide an approved hanging device for all mop sink tools to be properly stored and elevated in between use

Violation Description: Utensils and equipment shall be handled and stored in an approved manner, protected from contamination. All clean and soiled linen shall be properly stored. (114067(h), 114074, 114081, 114083, 114119, 114121, 114143(a-b), 114161, 114172, 114178, 114179, 114185, 114185.2, 114185.3, 114185.4, 114185.5)

41. PLUMBING: PROPERLY INSTALLED, GOOD REPAIR

POINTS

Inspector Comments: Provide an approved rigid drain line for the dishmachine with an approved air gap in place of the flex line to the floorsink drain.

Violation Description: All plumbing shall be installed in compliance with local plumbing ordinances, shall be maintained so as to prevent any contamination, and shall be kept clean, fully operative, and in good repair. All food-related equipment drain lines must discharge through an approved indirect connection. Any hose used for conveying potable water shall be made from approved material and used for no other purpose. (114171, 114189.1, 114190, 114192(b,c), 114193, 114193.1, 114199, 114201, 114269)

45. FLOORS, WALLS, CEILING: GOOD REPAIR / FULLY ENCLOSED

POINTS

Inspector Comments: Properly seal the gap located in the ceiling paneling over the mop sink basin.

Violation Description: The floors, walls, ceilings finishes must be of an approved material, durable, smooth, nonabsorbent, and easily cleanable. Food facilities shall be fully enclosed. (114143 (d), 114257, 114266, 114268, 114271, 114272)

Overall Inspection Comments

This re-inspection was conducted at operator request due to the downgrade and closure of the facility on 08/17/22. At this time, all violations from the previous inspection report have been corrected except for the violations listed above. Facility re-scored from 86= B to 97= A. B placard removed and A placard posted. Facility approved to re-open at this time. Closure sign removed. Management provided documentation showing pest control service was conducted today and yesterday. Continued treatments and monitoring are on schedule. No signs of rodent activity were observed at this time and all affected areas have been thoroughly cleaned/sanitized. Directive given to continue with pest control measures and monitoring. Use proper exclusion methods to prevent rodent/vermin entry. Maintain the facility free of vermin/rodent activity. Correct all remaining violations to prevent illness or injury.

All department heads including pest control management company representatives were present at the time of this re-inspection and corrective actions were reviewed at this time.

Did you know that effective January 1, 2018, the California Health and Safety Code was amended to make it easier for food facilities to donate food? Please consider donating your excess food product to a local food bank, pantry, or soup kitchen. As a good faith food donor, you are protected from civil and criminal liability if the food product later causes harm to its recipient, unless the injury is a direct result of gross negligence or intentional misconduct in the preparation or handling of the donated food. See Section 171425 of the Civil Code and Sections 114432 to 114434 inclusive of the Health and Safety Code. For more information visit our website at www.rivcoeh.org.

REASONS FOR IMMEDIATE CLOSURE OF A FOOD FACILITY

Per California Health and Safety Code Section 114409 (a):

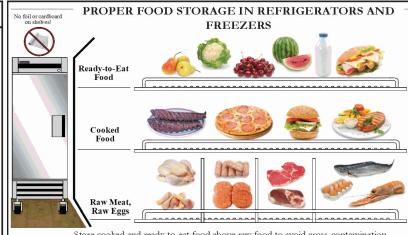

"If any imminent health hazard is found, unless the hazard is immediately corrected, an enforcement officer may temporarily suspend the permit and order the food facility immediately closed."

A food facility may be closed for any of the following reasons:

- · Overflowing sewage (inside or outside the facility)
- · No potable water
- · No hot water
- · No electricity
- · Rodent or insect infestation
- Any other conditions at the facility that may create an imminent public health risk

In addition to the reasons above, Per California Heath and Safety Code Section 114411:

"The enforcement agency may, after providing opportunity for a hearing, modify, suspend, or revoke a permit for serious or repeated violations of any requirement of this part or for interference in the performance of the duty of the enforcement officer."

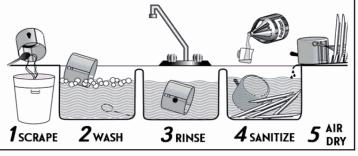

Store cooked and ready-to-eat food above raw food to avoid cross-contamination.

Keep all food covered to prevent contamination

MANUAL SANITIZING OF EQUIPMENT AND UTENSILS USING A THREE COMPARTMENT SINK

- 1. SCRAPE, clean, or soak items as necessary before washing.
- 2. WASH items in detergent and hot water of at least 100°F in the first sink.
- 3. RINSE items in clear water in the second sink
- 4. SANITIZE by submerging each item in a sanitizing solution in the third sink. Use one of the following sanitizing methods:
 - \bullet 100ppm of a chlorine based sanitizer for a minimum of 30 seconds in the solution
 - 200ppm of a quaternary ammonium based sanitizer for a minimum of 60 seconds in the solution
 - \bullet 25ppm of an iodine based sanitizer for a minimum of 60 seconds in the solution
 - Water at a temperature of 171°F for a minimum of 30 seconds in solution

5. AIR DRY all items on the drain board.

PROPER COOLING OF FOOD IN YOUR FACILITY

Potentially hazardous foods should always be rapodly cooled.

TIME IS THE KEY FACTOR IN PROPER COOLING

- Foods must cool from 135°F to 70°F in 2 hours or less
- Foods must cool from 70°F to 41°F in 4 hours or less

Use one of the following methods to cool food properly:

- Break large foods down into smaller portions and place in shallow pans no more than 4 inches deep. Metal pans cool better than glass or plastic pans.
- Add ice as an ingredient to replace water used in the recipe.
- Place foods within an ice bath and frequently stir the foods to speed the cooling process.
- · Loosely cover foods so that heat and steam can escape during cooling.
- Arrange containers within a refrigeration unit so that air can flow properly around containers.
- Use special equipment like chill paddles or blast chillers to rapidly bring down food temperature.

Use an accurate thermometer to verify the food is being cooled within proper timeframes

PROPER FOOD THAWING METHODS

- Under refrigeration
- 2. In a microwave oven on "defrost"
 - Submerged under cold running water in an approved preparation sink for no longer than 2 hours
 - As part of the cooking process

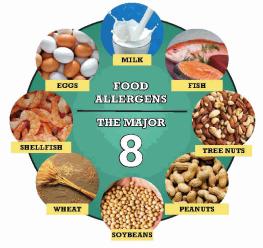

INTERNAL COOKING TEMPERATURES

Use a probe thermometer to take internal cooking temperatures

Food temperature cannot be felt - use your probe thermometer!
